FROM DESIGN TO DELIVERY, WE SET THE STANDARD THE SHEET METAL INDUSTRY OF NEW YORK

WHY BUILDING TRADES UNION?

The building trades union Sheet Metal Industry of New York is a labor and management partnership that provides the depth of technology, training, skills and workforce necessary to complete complex construction assignments of all types—from large high-rise projects, hospitals, schools and infrastructure to smaller residential and commercial developments such as strip malls and shopping centers—we set the standard. With over a century of experience, our industry is recognized as one of the most advanced networks of building trades professionals.

Working with management professionals employed by building trades union sheet metal contractors offers key advantages:

- It ensures that your project is being done using the highest standards in design, fabrication, installation and coordination of sheet metal systems.
- It ensures safe, energy-efficient indoor building environments for commercial, institutional and residential buildings of all sizes.

ESTABLISHED, SAFE, EFFICIENT WORKFORCE

Using our workforce, you can expect:

- Experienced, Bonded and Insured Contractors Who Stand Behind Their Work
- Skilled Personnel Who Do the Work Right the First Time, On Time and On Budget
- Ongoing Comprehensive Safety Training and Skill Upgrading
- Responsive, Established Contractors Who Operate and Maintain Sophisticated Fabrication Shops
- Knowledge of the Latest Technology and Innovations
- Progressive Labor-Management Partnership to Tailor Programs to Meet Your Needs

Without our workforce, you can expect:

- Project Delays Due to:
 - Scheduling
 - Planning
 - Skilled Labor Shortages
 - Material Shortages
 - Coordination Conflicts
- System Deficiencies
 - Leakage
 - Restrictions Due to Poor Fabrication Standards
 - Restricted Access for Servicing System Components
- Liabilities
 - Lack of Insurance
 - Lack of Workers Compensation Coverage

INVESTMENT IN SAFETY AND SKILL TRAINING

Our industry invests millions of dollars in providing safety equipment and training every year. Building trades union sheet metal apprentices employed by our contractors complete a five-year training program at our own full-time state-of-the-art school facility; and journeypersons receive ongoing professional training to ensure that they employ the safest work practices, sharpen their skills, and keep up with advancing technologies. Our contractors keep up to date on the latest safety publications, bulletins and videos to assist in managing their workers' full compliance with OSHA and EPA requirements. According to OSHA, over 70% of all construction fatalities occur on non-union jobsites.

PROGRAMS TAILORED TO MEET YOUR NEEDS

The Sheet Metal Industry of New York, a partnership of SMWIA-Local Union No. 28, Long Island SMACNA, and NYC SMACNA, has developed several innovative programs - Light Commercial, Airside Direct, and Equality - that can be tailored to fit the specific needs of all sizes of construction projects, and thereby allow our contractors to be competitive in these markets.

DO IT RIGHT THE FIRST TIME

Our union contractors set the standard for reducing operating costs, energy conservation and fire damage prevention. Working with the building trades union Sheet Metal Industry means quality, self-managed projects with our talented designers, estimators, mechanical coordinators and project managers. Our contractors are fully bondable, established companies with the necessary permits and the expertise to coordinate with multiple trades. In short, they understand the value of doing a job right the first time. Should a problem occur, they will return to the job until the matter is completely resolved.

WANT A BETTER CONSTRUCTION EXPERIENCE? THE BUILDING TRADES UNION SHEET METAL WORKFORCE IS READY FOR YOUR NEXT PROJECT
